

Gopo Finance

WHITEPAPER

Introduction

Welcome to Gopo Finance!

GOPO is a DeFi ecosystem focused on cross-chain technology that allows users to swap tokens across blockchains and Distributed Ledger Technology (DLT) networks, including Binance Smart Chain and Polygon. Cross-chain dApps, which work seamlessly in these networks, allow users to find better returns and transfer value. We provides user-friendly, efficient and secure crypto solutions and blockchain technology.

About Us

About Gopo Finance

Gopo will engage crypto projects with the capacity to distribute tokens and raise liquidity.

We plan to make a protected objective for little/medium/large financial backers and beginning stage projects. Financial backers benefit from selective admittance to protected, inventive undertakings and remunerating ventures on each blockchain.

Projects benefit from our association, giving free reviews by our group of blockchain specialists and designers and a committed local area prepared to back them.

Financial backers benefit from our methodology by approaching secure, dependable tasks that have the most noteworthy opportunity to succeed.

Why **Gopo** Finance is a BEP-20 Token?

The invention of Ethereum was revolutionary to the blockchain ecosystem as a whole, as for the first time ever people gained a way to launch their own tokens and smart contracts. For years, the Ethereum network was the default place for launching innovative blockchain-based projects.

However, the increasing popularity of cryptocurrencies, and the advent of decentralized finance (DeFi) solutions specifically, has caused massive problems with the efficiency of the Ethereum blockchain.

The transaction times and fees on the Ethereum network have become so high that many crypto enthusiasts stopped using ETH altogether, and blockchain developers started to look for a better alternative.

That's what led to the creation of Binance Smart Chain.

BEP-20 (Binance Smart Chain)

What is Binance Smart Chain?

Binance Smart Chain (BSC) is a high-end blockchain infrastructure created by Binance, one of the world leaders in providing blockchain solutions.

Binance Smart Chain was designed to fulfill the same purposes as Ethereum – the ability to launch tokens, smart contracts and decentralized applications – but with a much better efficiency.

While the Ethereum network uses a token format called ERC-20, the BSC blockchain has its original innovative token form. BEP-20. Tokens utilizing the BEP-20 format can be purchased, sold and transferred with the fees that can be 30-100x lower compared to Ethereum fees. Not only the fees, but also the transaction times of Binance Smart Chain are much lower than Ethereum's.

Overall, BSC is simply a much more effective solution than ETH. Since GPO is an ecologically-oriented project, choosing the more energy-efficient solution was the obvious choice to make.

Token Allocation & Tokenomics

Gopo Finance Tokenomics

Total Supply :	120.000.000.000.000.000 GOPO
Liquidity Pool (LP):	36.000.000.000.000.000
Reserve:	18.000.000.000.000.000
Burn:	46.800.000.000.000.000
Marketing & Dev:	18.000.000.000.000.000
Gopo Finance Foundation:	1.200.000.000.000.000
